Foreign trade fair participations by German states in 2026	37

Preface

The machinery and equipment industry is going through turbulent times, which is also affecting trade fairs and our members' trade fair activities. The pandemic, the war in Ukraine, and the economic policy reorientation of the previous German federal government, particularly with regard to China, caused considerable unrest on the machinery markets and in the federal government's foreign trade fair program. The situation remains unstable: With Donald Trump taking office and his erratic tariff policy, we are far from entering calmer waters. Therefore, considerations regarding geographical market diversification gain importance, and companies are looking for trade fairs in potentially new markets. Although the new German federal government has sent positive signals for the foreign trade fair program, consequences are still unclear, especially since they will not be noticeable until 2027 due to the long lead times involved in program planning and implementation.

Meanwhile, our industry continues to evolve and new trade fair formats are emerging, for example, around the topics of digital and energy transformation. Other trade fairs have taken up new topics or are no longer relevant to mechanical engineering due to market changes.

This trade fair calendar provides you with guidance on the global range of trade fairs relevant to machinery and equipment in 2026. Thanks to our cooperation with the Association of the German Trade Fair Industry (AUMA), we have access to an extensive database and can provide you with the dates registered up to August 2025.

On the following pages, you will find the provisional program of international trade fairs in Germany as well as other trade fairs and events relevant to machinery and equipment manufacturing. The geographically structured overviews are designed to make it easier for you to use. You will also find notes on German federal states and their participation in foreign trade fairs.

To date, 59 trade fairs have been included in the foreign trade fair program at the suggestion of the VDMA. We expect that a number of trade fairs will be added in the fall of 2025 because the budget planning and thus also the

planning for the foreign trade fair program have been delayed due to the early federal election. We will keep you up to date on the current development of the federal budget for foreign trade fairs and other important trade fair topics on our homepage (<https://vdma.eu/messe>) and in the newsletters of the VDMA sector associations.

If you have any questions about trade fairs relevant to machinery and equipment worldwide, please do not hesitate to contact the department and your sector association.

Sincerely,

Thilo Brodtmann

Chief Executive

Dr. Alexander Koldau

Head of the Trade Fairs and Symposia Department

Useful tips on using the trade fair calendar

This trade fair calendar is intended to help interested member companies with planning and decision-making regarding trade fairs held worldwide. The information in the trade fair calendar should not be seen as a recommendation to take part in or attend an event – nor does it make any claim to completeness. No liability is accepted for the information provided.

Choosing a suitable event takes careful consideration. The VDMA Trade Fairs and Symposia Department and the Trade Associations at VDMA provide help and support to interested member companies. This trade fair calendar has been compiled in consultation with the Trade Associations that are particularly active in the business of trade fairs abroad.

The trade fair calendar contains mechanical engineering-related trade fairs and technology symposia

- that are focus events of the individual segments of mechanical engineering worldwide,
- that are established events in the respective market,
- in which the Federal Government is involved (largely) on behalf of VDMA as well as trade fairs, about which there is detailed information that, in the view of VDMA, indicates that the event has a sufficient minimum size and level of internationality.

In line with the international orientation of the trade fair business, we have realized this edition of the trade fair calendar in English.

Some VDMA Trade Associations have their own trade fair calendars or lists, which they offer to their members. These Trade Associations include the following:

- Construction – Equipment and Plant Engineering
- Process Technology Forum
- Woodworking Machinery
- Plastics and Rubber Machinery
- Marine Equipment and Systems
- Metallurgy
- Mining & Minerals
- Organic and Printed Electronics Association
- Textile Care, Fabric and Leather Technologies
- Textile Machinery
- Process Plant and Equipment
- Machine Tools and Manufacturing Systems

Legend and executing companies

- G** = Official joint company booth with information booth and involvement of the Federal Ministry for Economic Affairs and Energy (BMWE)
- I/IZ** = Official information booth / official information center of the BMW E
- VDMA** = Joint company involvement of VDMA, organized by private business. For more information, contact your trade association or the Trade Fairs and Symposia Office.

Foreign trade fair participations by German states in 2026

In addition to the Federal Government's involvement in trade fairs abroad, some Federal States also offer support for companies interested in exporting. VDMA is extensively involved in the selection of these funding measures through its Regional Subsidiaries. To be eligible for funding, the company must be based in the Federal State in question. Collaborations between multiple states are increasingly common. For further information, please contact the VDMA Regional Subsidiary responsible for your location or use the contact addresses for the individual states as listed here: <https://www.auma.de/ausstellen/weltweit-ausstellen/foerderungen/>
